BASE SYSTEM (1) + MOUNTS (2) + LOAD (BICYCLES, BOATS, SKI, BOARDS, CARGO)

SHOULD NOT BE GREATER THAN YOUR VEHICLE'S MAXIMUM ROOF WEIGHT LOAD LIMIT

CHECK THE FIT LIST. This number refers to the MAXIMUM weight in POUNDS that must not be exceeded (Yakima rack system, mounts and gear together). Some vehicles will be rated lower than 165 lbs. Specific weight ratings are listed in the "max weight" column in the Fit List or in your vehicle's owner's manual.

READ THE NOTES!

Always be sure to read the fit notes referenced in the Fit List for your vehicle. The notes include fit details and limitations, which will assist you in choosing your rack system. These are really important, so please read them!

CROSSBAR SPREAD INFORMATION

MAX CROSSBAR SPREAD

Max crossbar spread refers to the maximum distance (in inches and centimeters), between the front and rear bars, center to center. Crossbar spread is a key factor in determining the loads that the system can safely carry on a car. The chart below lists a minimum and maximum spread for what can be carried with the listed mounts.
